ACADEMIC DETAILS

Examination	University	Branch	Year
Intermediate	Savitri Vidya Vihar Interme- diate School	UP Board	2020
High School	Shri Ram Public School	CBSE	2018

PROJECTS

- **Media Recommendation System Using Machine Learning** [github](#)
(11/2023 , 02/2024)
 - Technologies: Python, Scikit-learn, Pandas, NumPy, Flask, HTML/CSS, Jupyter Notebook

Developed a content-based and collaborative filtering recommendation system to suggest personalized movies, songs, or shows to users.

Utilized machine learning algorithms such as KNN and cosine similarity to analyze user preferences and item metadata.

Engineered features from datasets including genres, ratings, keywords, and user behavior patterns.

Implemented a web-based interface using Flask for user interaction and dynamic recommendation display.

Achieved high relevance and user satisfaction through continuous model tuning and evaluation using metrics like precision and recall.
- **MultiClass Image Classification Using Deep Learning** [github](#)
(10/2024 , 02/2025)
 - Technologies: Python, TensorFlow/Keras, OpenCV, NumPy, Matplotlib, Jupyter Notebook

Built a deep learning model to classify images into multiple categories using Convolutional Neural Networks (CNNs).

Preprocessed image data (resizing, normalization, augmentation) to improve model generalization and robustness.

Designed and trained a CNN architecture from scratch, achieving high accuracy on benchmark datasets like CIFAR-10 or custom datasets.

Applied techniques such as dropout, batch normalization, and data augmentation to prevent overfitting.

Evaluated model performance using accuracy, confusion matrix, and classification report; fine-tuned hyperparameters for optimal results.
- **Smart Classroom Management With Ai Features** [github](#)
(08/2025 , Present)
 - Technologies: Python, OpenCV, TensorFlow/Keras, Flask, SQLite, HTML/CSS, JavaScript

Designed an AI-powered classroom management system to automate tasks such as attendance tracking, student monitoring, and resource scheduling.

Implemented facial recognition using OpenCV and deep learning for real-time attendance marking and identity verification.

Integrated NLP-based chatbot for answering student queries and providing academic assistance.

Enabled real-time notifications and performance tracking for teachers and administrators through a user-friendly dashboard.

Used Flask to develop a web interface connecting backend AI modules with frontend functionalities.

TECHNICAL SKILLS

- **Languages :** C/C++, Python, Java, Javascript, HTML, CSS.

- **Frameworks** : ReactJS, NodeJS, Numpy, Tensorflow, OpenCV, Matplotlib, Pandas.
- **Databases** : MySQL, MongoDB, SQLite.
- **Tools** : VScode, Turbo C++, Google Collab, Eclipse, Intellige, Jupyter Notebook..

CERTIFICATIONS

- **AWS Cloud Skill-Up: Summer Training Camp** (AWS Cloud Clubs Sharda University)

HOBBIES

- Exploring New Technologies.
- Watching movies.
- Sometime reading books.

STRENGTH

- Adaptable and quick to grasp new concepts.
- Passionate about building real-world solutions using AI & ML.
- Hardworking.
